THE MEDITERRANEAN NEWS SEA

THE GREAT TSUNAMI

This is picture of a big, enormous and dangerous tsunami in Greece some years ago.

You can see a big tsunami which is destroying a road.

At the back you can see a mountain.

At the right-hand you can see the big wave.

At the bottom you can see a road which is destroyed.

MIGUEL ALONSO ALONSO 5º A INGLÉS

A NEW ISLAND

Last month a dive discovered a new island... was very surprised and very happy.

He told us that at the beginning he didn't know how to call the island. But then he thought that it was a good idea to call it **Atlantica**.

I asked him if he found life on that new island, **Atlantica**. He answered he didn't, but there could be because there were houses.

The island was next to Italy, but when he explored it he saw an enormous hole. That hole made him think. At that moment he remembered that in a book he read that the hole in **Santorini (Greece)** had the same size that the island so it could be the piece of detached land from Santorini that the water currents had moved. That was the reason why he called it **Atlantica**.

My opinion is that this island is really incredible because it isn't on the surface, it is under water. I think that this island is...

AMAZING !!!!!!!

Natalia Herrera

TSUNAMI

In Santorini a city of the tsunami... named by a terrible tsunami. There have been many disasters in great part of the world. We are investigating how it produced tsunami. Santorini was destroyed just like people the chairman said that it was because of oil tankers. Tomorrow it will bury the bodies of the people killed by the tsunami. Please let us give them help and love to those who have died.

A NEW ISLAND IN THE WORLD

The new island is in the Mediterranean sea. Some fishermen find this week. In the island there are a lot of animals a new species. For example fish with eight fins, horses of a lot of colors, cows with one thousand eyes, very big insects and snakes smaller than human hand. There are many trees and plants. A lot of Scientifics are very interested whit the island. Rich people want to build a hotel for tourist. Others want to protect the island with the animals and plants. They don't want pollution.

In the island there is a small village near the big river. They Scientifics are teaching. The people of the village don't want the hotel.

The big volcano

Let and tell you, the wonderful discovery, the Island Volcano. Yesterday fishing like every morning, I found about 7 miles of the coast of Ibiza a new island out of the sea. I approached to see better and was surprised by the beautiful vegetation and the many animals that live there. But the shock that I took was biggest to discover it was a volcano.

I ran to my boat and I reached Ibiza where and I tell my discovery the police Castro Martínez. And today they are investigating the source of this volcano. It will surely take my name.

TRAGEDY IN NAPLES

THE VESUVIO VOLCANO ERUPTS

Yesterday, 15th May, in Naples, in a city located to the south of Italy next to the Mediterranean sea, it happens something horrible: An old volcano erupted. The final of the champions League play. Suddenly the sky was full of smoke and a lot of ashes started to fall on the grass. It was the old volcano!

The stadium was full of people, the situation was chaotic. A great number of people died and others survived.

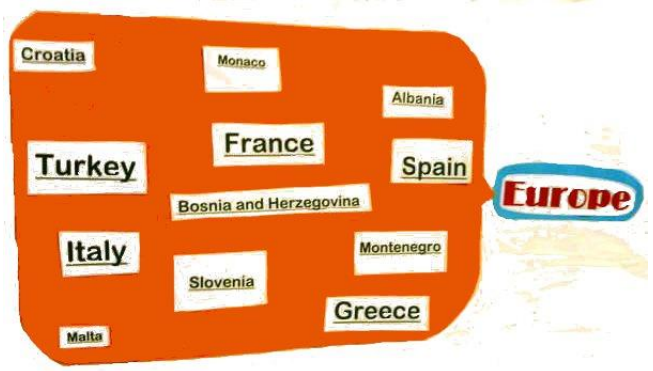

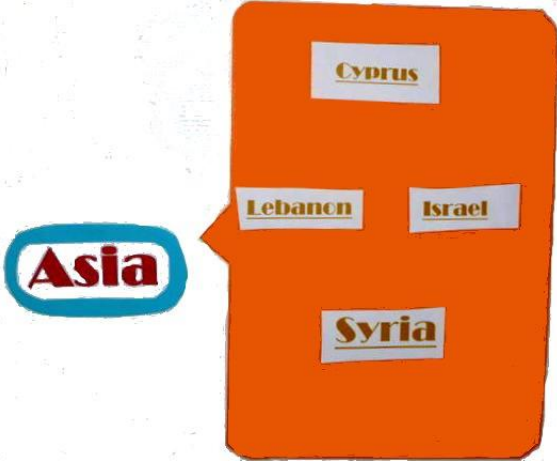

The players were lucky, only two of them died. It was a catastrophic football game. We remember it all our life.

The old volcano erupts

COUNTRIES AND FLAGS

THE MEDITERRANEAN SEA IS A LARGE SEA THAT IS LOCATED BETWEEN EUROPE, NORTHERN ASIA, ITS TOTAL AREA IS 970,000 SQUARE MILES (2,500,000 SQ KM). THERE ARE 21 NATIONS WITH COASTLINES ALONG THE MEDITERRANEAN SEA.

Croatia

- Area: 21,851 square miles (56,594 sq km)
- Population: 4,483,804
- Capital: Zagreb

Turkey

- Area: 302,535 square miles (783,562 sq km)
- Population: 78,785,548
- Capital: Ankara

Monaco

- Area: 0.77 square miles (2 sq km)
- Population: 30,539
- Capital: Monaco

Malta

- Area: 122 square miles (316 sq km)
- Population: 408,333
- Capital: Valletta

Italy

- Area: 116,348 square miles (301,340 sq km)
- Population: 61,016,804
- Capital: Rome

France

- Area: 248,573 square miles (643,801 sq km)
- Population: 65,312,249
- Capital: Paris

Bosnia and Herzegovina

- Area: 19,767 square miles (51,197 sq km)
- Population: 4,622,163
- Capital: Sarajevo

Slovenia

- Area: 7,827 square miles (20,273 sq km)
- Population: 2,000,092
- Capital: Ljubljana

Albania

- Area: 11,099 square miles (28,748 sq km)
- Population: 2,994,667
- Capital: Tirana

Montenegro

- Area: 5,333 square miles (13,812 sq km)
- Population: 661,807
- Capital: Podgorica

Spain

- Area: 195,124 square miles (505,370 sq km)
- Population: 46,754,784
- Capital: Madrid

Greece

- Area: 50,949 square miles (131,957 sq km)
- Population: 10,760,136
- Capital: Athens

Israel

- Area: 8,019 square miles (20,770 sq km)
- Population: 7,473,052
- Capital: Jerusalem

Asia

Cyprus

Lebanon **Israel**

Syria

Syria

- Area: 714,498 square miles (185,180 sq km)
- Population: 22,517,750
- Capital: Damascus

Cyprus

- Area: 3,572 square miles (9,251 sq km)
- Population: 1,120,489
- Capital: Nicosia

Lebanon

- Area: 4,015 square miles (10,400 sq km)
- Population: 4,143,101
- Capital: Beirut

MOROCCO **ALGERIA** **LIBYA** **Africa** **EGYPT** **TUNISIA**

Libya

- Area: 679,362 square miles (1,759,540sqkm)
- Population: 6,597,960
- Capital: Tripoli

Algeria

- Area: 919,595 square miles (2,381,741sqkm)
- Population: 34,994,937
- Capital: Algiers

Egypt

- Area: 386,662 square miles (1,001,450sqkm)
- Population: 82,079,636
- Capital: Cairo
- Note: Most of Egypt is considered to be in Africa but its Sinai Peninsula is in Asia.

Morocco

- Area: 172,414 square miles (446,550 sq km)
- Population: 31,968,361
- Capital: Rabat

Tunisia

- Area: 63,170 square miles (163,610 sq km)
- Population: 10,629,186
- Capital: Tunis

GUESS THE COUNTRY

MEDITERRANEAN FOOD

HEALTHY FOOD

STEAKS BAKED ON GOLDEN BED BAKED POTATOES

Ingredients: (2 people)

- 4 fillets of gold (in the mediterranean sell trays & fillets)
- 5-6 potatoes
- lemon
- 3-4 red and green peppers (single)
- 1 clove garlic
- pinch of olive oil
- half glass of white wine
- salt and pepper

Preparation:

Boil the potatoes and split them into slices, not too thin nor too fat, more or less in size. Arrange in a baking tray with a splash olive oil and bake for 10 min at 200°C. Cut the onion and pepper into julienne (thin strips), and add it over the potatoes when they have spent the 10 min. Check olive oil over and continue baking 7-8 min more. Put 10 min. Put the golden fillets over and bake another 5 min. Drizzle in olive oil, with parsley and a little olive oil and half a glass of wine and sprinkle over the golden cook 5 min more and go.

MOJETE MURCIANO

- 1 Tomato
- 2 eggs
- 2 peppers
- 30 tuna
- 1/2 olive (olive)
- 5 olive (olive)
- 20 olive (olive)

Boil the eggs, Peel the eggs, Cut the egg and the tomato. Put all the ingredients in a bowl and add the olive oil.

I like it!

FRUIT SALAD

Ingredients:

- lemon
- apple
- orange
- pear
- strawberry
- watermelon

Preparation:

- Wash all the fruit
- Peel and cut the fruit
- Put it in a plate
- Drizzle with lemon juice
- Put it in the plate

THE MEDITERRANEAN SEA

Lucia Amore 4/8

MEDITERRANEAN PAELLA

Ingredients

- oil
- salt
- dye
- water
- rice
- onion
- peppers
- squid
- fish
- mussel
- olives
- eggs
- prawns.

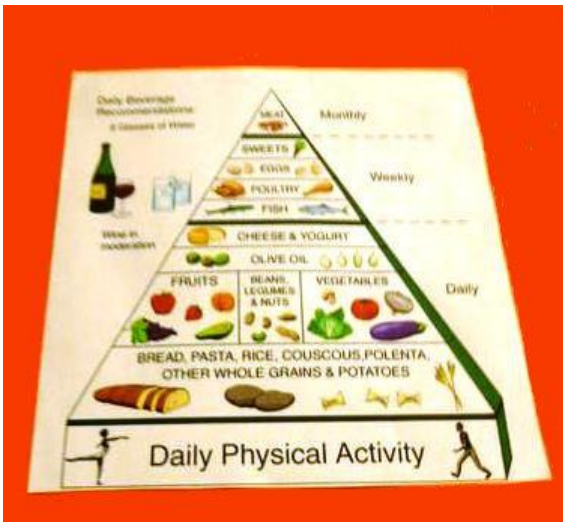

→ recipe.

1. Chop the onion, red pepper and green pepper.

6. Wait for it to cook rice.
7. Garnish with the olives, mussels, prawns and boiled egg.

Malena Domingo 4/15

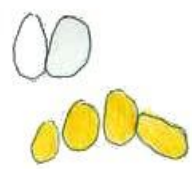

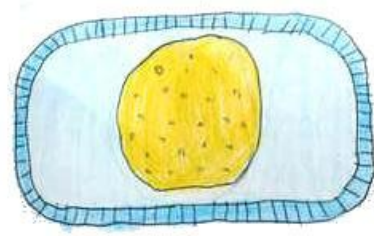

SPANISH OMELETTE

Minimum difficulty. Time: 15 minutes.
Ingredients and quantity for four people:
 - You need 4 potatoes and two eggs.

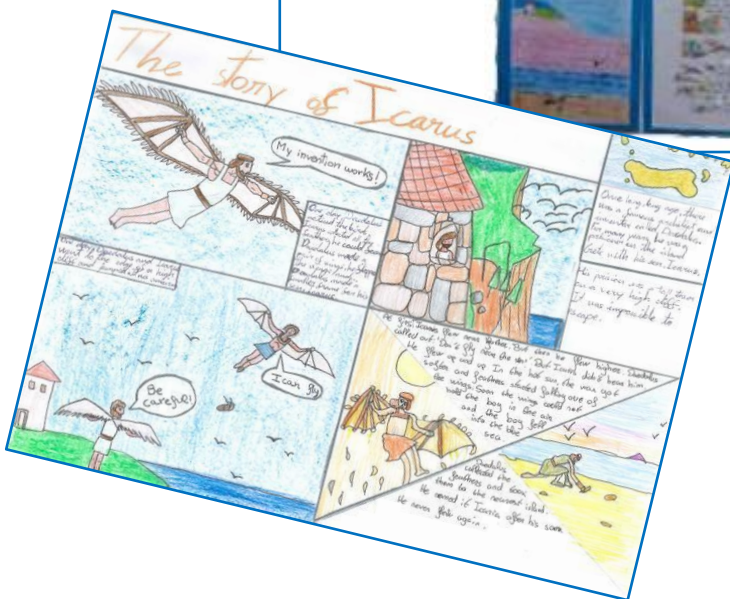

Method:

- First peel the potatoes.
- Wash the potatoes.
- Cut the potatoes.
- Fry the potatoes.
- Break the eggs.
- Beat the eggs.
- Mix the eggs and potatoes.
- Add some salt.
- Fry both sides.
- And now eat the Spanish omelette.

The story of Icarus

The story of Icarus

① There was a famous architect and inventor called Daedalus, and he was a prisoner in the island of Crete with his son, Icarus.

② Daedalus and Icarus were prisoners in a tower in a high cliff and it was impossible to escape.

③ One day Daedalus realized ^{there} were birds and suddenly he called Icarus and he built a couple of wings in that frame and when he finished he puts the wings and flew.

④ One day Icarus and Daedalus went to try invention of Daedalus.

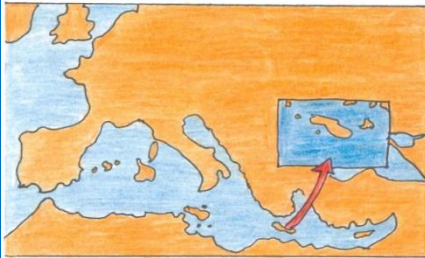

⑤ Daedalus told Icarus not fly ^{near} to sun but this didn't hear and fell into the sea.

⑥ Daedalus collect the feathers and looked to be in next island and he didn't fly again because his son died flying.

THE STORY OF ICARUS

Once long, long ago, there was a famous architect and inventor called Daedalus. He was a prisoner on the island of Crete with his son Icarus.

His prison was a tall tower on a very high cliff. It was impossible to escape.

One day Daedalus noticed the birds. Daedalus made a frame in the shape of wings. The invention worked and he made a smaller frame for his son, Icarus.

One windy day, Daedalus and Icarus went to the edge of a high cliff and jumped. It was amazing!

Icarus flew near the sun. The wax got softer and feathers started falling out of the wings. Soon the wings could not hold the boy in the air and he fell into the blue sea.

Daedalus collected the feathers. He named it Icaria after his son. He never flew again.

The story of Icarus

My invention works!

One day Daedalus noticed the birds. Icarus collected all the feathers he could see. Daedalus made a pair of wings, he shaped the wings around Icarus. Daedalus made a smaller frame for his son, Icarus.

Once long, long ago, there was a famous architect and inventor called Daedalus. For many years, he was a prisoner on the island of Crete with his son, Icarus.

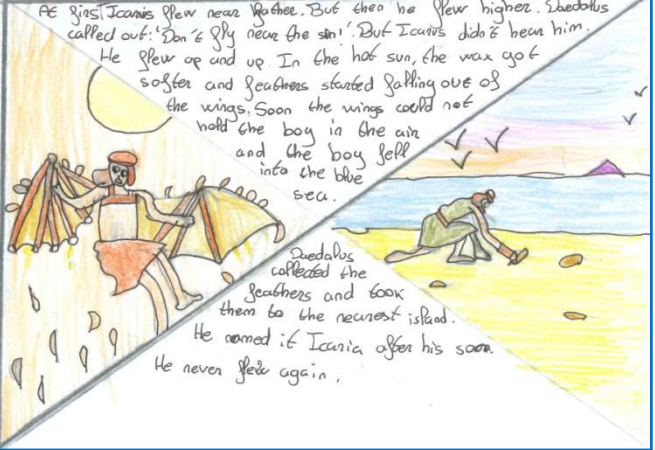

His prison was a tall tower on a very high cliff. It was impossible to escape.

I can fly

Be careful!

One day Daedalus and Icarus went to the edge of a high cliff and jumped at the same time.

At first Icarus flew near the sea. But then he flew higher. Daedalus called out: 'Don't fly near the sun!' But Icarus didn't hear him. He flew up and up. In the hot sun, the wax got softer and feathers started falling out of the wings. Soon the wings could not hold the boy in the air and the boy fell into the blue sea.

Daedalus collected the feathers and took them to the nearest island. He named it Icaria after his son. He never flew again.

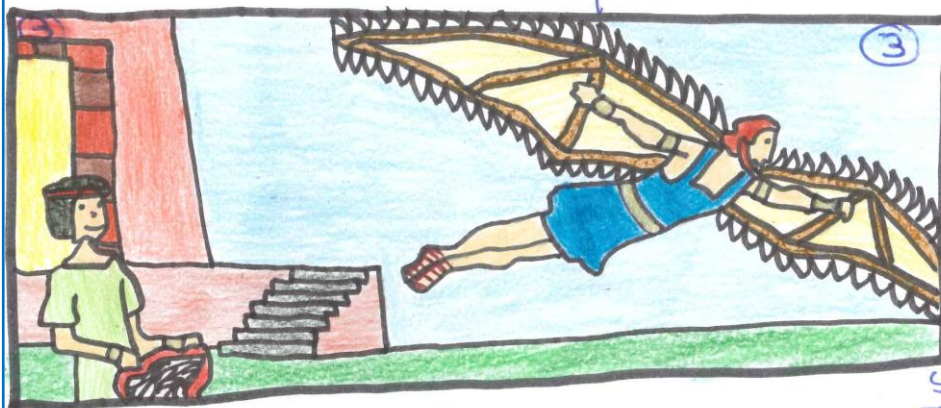

THE STORY OF ICARUS

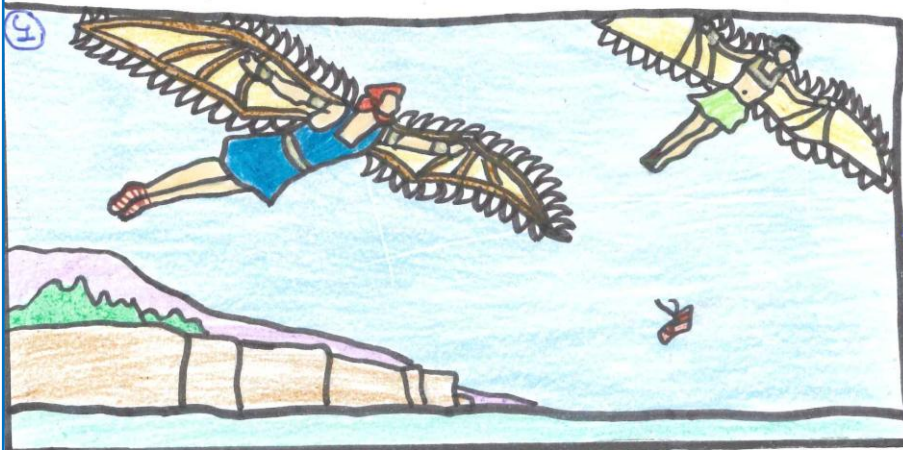

1:- Once long, long ago, a famous inventor called Daedalus was a prisoner on the island of Crete with his son Icarus.

2:- Daedalus and Icarus prison was a very tall tower on a high cliff. They couldn't escape.

3:- One day, Daedalus had an idea. He made a frame on the shape of wings, and he glued feathers to it with wax.

4:- A windy day, Daedalus and Icarus went to the edge of the cliff and they jumped.

5:- Daedalus collected some feathers of the frame of Icarus; take them to the nearest island and named it Icaria.

5:- But Icarus flew higher than his father, the wax started to get softer and he fell into the water.

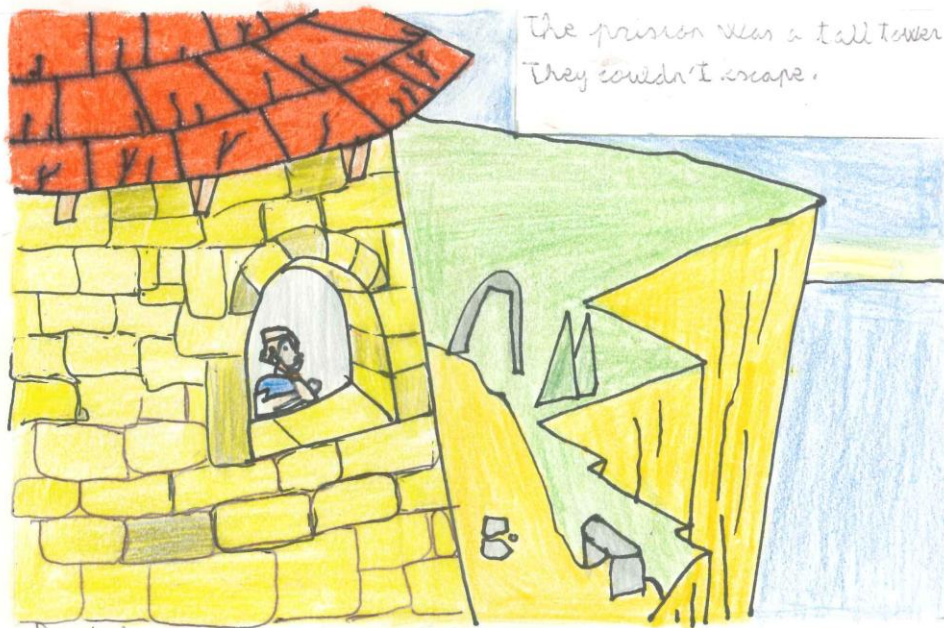

Alejandro y Daniel Fernández

The story of Icarus

The island of Crete.
Daedalus and Icarus were
prisoners in this island

The prison was a tall tower
They couldn't escape.

Daedalus made a wings with wax and feathers

The invention works, Daedalus and Icarus flew.

Icarus fell down from the sky:
Icarus died

Daedalus took in the nearest island
and named Icaria, Daedalus didn't fly
never.
